The reading of the report of the bishops at yesterday's session wa an eye opener in this respect. Dr. Leonard, of Cincinnati, who was the prohibition candidate for governor of Ohio, is one of the leaders on that subject, and as he is chairman of the com

### THE PARMER'S ALLIANCE.

The farmers are now actively engaged in looking after their own interests. This is a hopeful sign no matter how hard it may bear upon other interests for the moment. For after all the basis of a nation's prosperity is its agricultural class. The main thing for the farmer is the ability to keep his health. Ill health cuts nto him worse than farm mort gages or borrowed money or axes. If the average farmer can keep his health he will be able to meet his obligations. It may take him longer time than h counted upon but he will be able o show a balance on the right ide of the ledger eventually. The great danger that he need fear is aking cold. THE STRAWBERRY. Timely Consideration of the

Theme.

Chicago Post: The time has not quite ome for atrawberries and cream. We must "bide a wee," until the berries get warmed through to their hearts. Thre weeks more and they will be in their pa fection—so far beyond the perfection of anything else. Then we shall be discus sing those same old points, "Are the wild berries really richer than any cultivated ones?" "Can one distinguish the 'King of France from the 'Queen of Italy': that the little late dark sorts are the weetest of all and that the present berries, each on a leaf and with its hul intact, is highly resthetic, but not half so satisfactory as our being able to crush them in sugar and cream. At present the fruit is of so tart a disposition that we would best cook it in one fashion or another. There are those who prefer in tarts or pies. Others elect the tooth some dumpling as their favorite mode of serving, but with a majority of us the strawberry abortonke has first choice. Now there is the reel shortcake which to be real must by all means be "short"

it by piling up alternate layers of sweet cake and firm berries, and, since nothing can make strawberries aught else but delightful, it will find its meed of presse. The true shortcake is a more difficult matter. In the first place, what is known as a "light hand" is needed for the shortbread, which may well be a feathery his. ouit, made quite "short," or rich. In the second place, judgment is essential to duly proportion the amount of shortcake made to the strawberries and to the cream attainable. One square inch of strawberry shortcake, thoroughly permeated with the crushed fruit, is worth far more than is a whole cake gingerly supplied with berries. As to cream, the rood cemetery, a short distance away, by rule is utterly sumple. You cannot pu on too much. The herries should be seded by Goodman's band, which dis orushed and liberally sugared before the coursed solemn funeral music. At the oake is begun. WE THE UNDERSIGNED, contracting plasterers, after much experience and observation, take pleasure in testifying to the practical character of ROOK PLASTER, and while it will remove a not inconsiderable amount of business, namely that of patching, we advocate its use, as it enables us to do work and guarantee the results, and enables us to carry on our trade at all seasons of the year, and modernizes that part of building enterprise which has undergone practically no improvement in the last two thousand years, placing the business of the plasterer on the same footing as that occu-pied by the other trades through the advent of machinery and improved methods.
